

VINAYAKAMOORTHY A V

Mobile number: 96555150667

Email: vinayakamoorthyav.bcy24@rathinam.in

PROFESSIONAL SUMMARY

Motivated and innovative Computer Science student with hands-on experience in AI, IoT, and software development, focused on building real-world technology solutions. Skilled in developing intelligent systems, embedded applications, and data-driven tools using modern technologies. Passionate about continuous learning, problem-solving, and creating impactful digital products. A proactive team player with strong analytical and leadership abilities, seeking opportunities to contribute to innovative technology projects and startups.

TECHNICAL SKILLS

Programming Languages: Python, C/C++, JavaScript (basic)

AI & Data Technologies: Artificial Intelligence, Machine Learning Concepts, Data Analysis, API Integration

IoT & Embedded Systems: Arduino, ESP32, MPU6050 Sensors, GPS Modules, Accident Detection Systems

Cloud & Backend Technologies: Firebase, REST APIs, Cloud-based Application Integration

Web & App Development: HTML, CSS, JavaScript, UI/UX Design, Interactive Portfolio Development

Tools & Platforms: Git, GitHub, VS Code, Arduino IDE, Figma (UI Design)

Other Technical Knowledge: Digital Logic Design, System Architecture Basics, Software Development Lifecycle, Video and Photo Editing

CERTIFICATIONS & TRAININGS

- Amazon data structure and algorithms
- Meta verified programming in python
- SIH Finalist

EDUCATION

B.E. in CSE (Cyber security) – Rathinam technical campus(Autonomous), Coimbatore.

SOFT SKILLS

- **Problem Solving:** Strong ability to analyze problems and design innovative technology solutions.
- **Creative Thinking & Innovation:** Passionate about generating new ideas and building unique projects such as AI tools and IoT systems.
- **Leadership:** Experience in initiating projects and guiding ideas from concept to implementation.
- **Time Management:** Ability to balance academic work, projects, and learning new technologies effectively.
- **Adaptability & Continuous Learning:** Quick learner with a strong interest in exploring emerging technologies like AI, cloud, and automation.
- **Team Collaboration & Communication:** Able to work effectively with teams, share ideas clearly, and collaborate on technical projects.

PROJECTS & EXPERIENCE

- **IoT Helmet Safety & Accident Detection System** - Developed an IoT-based smart helmet system designed to detect accidents and send emergency alerts with live GPS location. Integrated sensors such as MPU6050 and utilized ESP32 with Bluetooth communication to monitor impact and rider safety conditions in real time.
- **AI-Based Forex Trading Signal System (Concept Development)** - Designed a trading assistant concept that generates forex trading signals based on user-defined strategies and financial data APIs. Focused on integrating market data, strategy-based analysis, and user-friendly application interfaces.
- **Government Exam Preparation Assistant (Concept Design)** - Conceptualized a digital assistant aimed at helping students prepare for competitive exams such as TNPSC and Group exams. Planned features include study scheduling, topic tracking, reminders, and AI-based learning assistance to improve study efficiency.
- **Interactive AI Portfolio & Personal Tech Platform** - Designed and developed an interactive portfolio showcasing projects, skills, and achievements using modern web technologies and UI/UX design principles. Focused on creating a dynamic and engaging user experience for presenting technical work.
- **Safety Monitoring & Sensor Data Application** - Worked on a monitoring application that visualizes sensor data from IoT devices in real time. Designed UI components optimized for both light and dark themes to enhance usability and readability.

DECLARATION

I hereby declare that the above information is true and accurate to the best of my knowledge.
